Introduction

This document provides information about Hot Fix #11 for Tidal Enterprise Orchestrator (TEO) version 2.2.

Prerequisites

Components Used

The information in this document is based on Tidal Enterprise Orchestrator version 2.2.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Hot Fix #11

Problem

This hotfix fixes an issue where groomed tasks might leave invalid references to categories in the TEOProcess database.

Solution

Install Hot Fix #11 for TEO 2.2. The hotfix can be found here, or by contacting Cisco Support.

Futher Information

This should be a standard hotfix for all customers. Cisco Support can be contacted through standard means.
