Introduction

This document describes Hot Fix #4 for Tidal Enterprise Orchestrator (TEO) version 2.2.

Prerequisites

Components Used

The information in this document is based on TEO version 2.2.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Hot Fix #4

Problem

If you have process A inside of process B and you use output from process A, the variable references and configuration could be lost when you make a copy of process B.

Solution

Install Hot Fix #4 for TEO 2.2. The hot fix can be found here or by contacting Cisco Support.

Futher Information

This hot fix is recommended for all customers. Cisco Support can be contacted through standard means.
