Introduction

In certain versions of Tidal Enterprise Scheduler, actions associated with classes do not work after the classes are transported. This document describes how to resolve this issue.

Prerequisites

Requirements

Cisco recommends that you have knowledge of Tidal Enterprise Scheduler 5.3.1.X.

Components Used

The information in this document is based on the Tidal Enterprise Scheduler 5.3.1.X.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Problem

Actions that are associated with classes do not work after the classes are transported.

Solution

This problem is resolved in build 5.3.1.190 of the transporter. In order to resolve this issue, the transporter notifies the master when classes are added, updated or deleted. The transporter also notifies the master about relationships between actions and classes.

Complete these steps in order to download the latest version of the Transporter:

1. Go to <http://www.cisco.com/cisco/software/navigator.html?i=!ch> (registered customers only) .
2. Select **Products > Network Management and Automation > Data Center Management and**
