Introduction

This document describes how to increase the amount of data displayed in the Job Output tab. By default, the Client limit for job output data is 10 Megabytes.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on the Tidal Enterprise Scheduler versions 5.3.1 or later.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Problem

The amount of job output displayed in the Job Output tab is truncated because it is too large.

Solution

Complete these steps in order to increase the amount of job output data displayed in the Job Output tab:

1. Right-click the **Client** shortcut, and click the **Properties** option.
2. Add the OUTPUTLIMIT=MB parameter to the end of the Target field. As an example:

```
"C:\Program Files\TIDAL\Scheduler\client\sacClient.exe"  
Alias=ADMIRAL OUTPUTLIMIT=20
```

Note: MB = Number of Megabytes
