- TEO 2.1.2 HotFix 8

Related Information

Introduction

This article details hotfix #8 for Tidal Enterprise Orchestrator version 2.1.2.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on the Tidal Enterprise Orchestrator Version 2.1.2.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Issue

Performance data was not updated in the SCOM warehouse. This is intended for Incident Analysis for SAP customers only and those only who use SCOM as a plugin to TEO.

TEO 2.1.2 HotFix 8

HotFix 8 fixes the performance data in SCOM. Any release after Tidal Enterprise Orchestrator Version 2.1.2 includes this hotfix and therefore is not required to be patched. Open a case and contact support in order to get access to this and any other Tidal Enterprise Orchestrator HotFix.
