

# Host Dashboard

# Host Dashboard

- **Invocation**

- Navigate to this page by clicking the hostname under the Managed Hosts tab on the Home page.
- Also invoked by using the “Search a host” search bar on the main menu bar.

- **Overview**

- The Host Dashboard is a dynamic view. It refreshes every 10 seconds to display up-to-date information.

- **General**

- Display the host connection information.

- **Software Packages**

- Display the software packages of the host.

- **Scheduled/Failed Installations**

- Display all the scheduled and failed installations. When an installation is executing, a spinning icon is displayed next to the scheduled installation.

- **Install/Software Inventory History**

- Display both the install and software inventory history.

- **Action**

- Schedule an Install.
- Delete All Scheduled Installs.
- Delete All Failed Installs.
- Retrieve the Latest Software.
- Edit Host.
