

## Post-MWC Tweetchat #ciscospchat

Transcript from February 24, 2011  
All times are British Time (BST)

### February 24, 2011

---

- 12:12 am **GreenLnEmeritus:** RT @CiscoLive: #Cisco Distinguished Engineers will be joining the mobility tweetchat Feb 24 10am PST <http://om.ly/BNcmB> #ciscospchat #mwc11
- 12:15 am **CiscoSPMobility:** Chat w/ Cisco Distinguished Engineers about all things mobility tomorrow at 10am PST, 6pm GMT <http://csc0.ly/6018ufZ8> #ciscospchat
- 12:29 am **CiscoGeeks:** RT @ciscospmobility: Chat w/ Cisco Distinguished Engineers about all things mobility tmrw @ 10am PST <http://csc0.ly/6018ufZ8> #ciscospchat
- 2:39 am **CiscoSPMobility:** What did you think was the biggest topic at MWC? What should've been? Let us know tomorrow @ 10am PST <http://csc0.ly/6018ufZn> #ciscospchat
- 4:40 am **CiscoSPMobility:** Don't forget to join tomorrow's #ciscospchat @ 10amPST, 1pmEST. Chatting about hot topics from MWC <http://csc0.ly/6012ufZw>
- 9:34 am **ReneeHouseVzB:** RT @CiscoSPMobility: Don't forget to join tomorrow's #ciscospchat @ 10amPST, 1pmEST. Chatting about hot topics from MWC <http://csc0.ly/6012ufZw>
- 2:21 pm **CiscoSPMobility:** Today's the day! Our Cisco Distinguished Engineers will be joining the mobility tweetchat @ 10am PST <http://csc0.ly/6011ufwX> #ciscospchat
- 4:15 pm **underdev:** Pity the #ciscospchat is starting so late; 10am in frisco is 7pm for most of Europe.
- 4:47 pm **AmdocsInc:** Don't forget, @CiscoSPMobility's tweetchat on hot topics from #MWC11 - 10am PST, 1pm EST, open to all! <http://csc0.ly/6012ufZw> #ciscospchat
- 5:01 pm **CiscoSPMobility:** 1 hour till our post-MWC #ciscospchat. See you at 10am PST! More details on participating: <http://csc0.ly/6011ufbU>
- 5:29 pm **CiscoSPMobility:** Just 30 mins till the #ciscospchat about all the hot topics at MWC. Can't wait to chat! <http://csc0.ly/6010ufbC> #ciscospchat
- 5:29 pm **MsMobileConverg:** leaving through vogue.com before #ciscospchat ! cuz that's how I roll, baby! #art and #fashion and #media my sweets!
- 5:43 pm **garykim:** checked in #ciscospchat
- 5:45 pm **CiscoSPMobility:** 15 mins till the #ciscospchat. Still time to grab a cup of coffee before we start! <http://csc0.ly/6010ufjy> #ciscospchat
- 5:47 pm **CiscoSPMobility:** @garykim Hi Gary. Welcome! We'll be starting #ciscospchat in less than 15 mins
- 5:54 pm **ajmoodley:** RT @CiscoSPMobility: @garykim Hi Gary. Welcome! We'll be starting #ciscospchat in less than 15 mins
- 5:59 pm **kshatzka:** #ciscospchat Hi everyone. Kevin Shatzkamer, one of Cisco's Distinguished Systems Architects, here.
- 6:01 pm **CiscoSPMobility:** Hi everyone! Welcome to our post #MWC11 #ciscospchat!
- 6:02 pm **MsMobileConverg:** @CiscoSPMobility hello! #ciscospchat
- 6:04 pm **kshatzka:** @MsMobileConver Hi! Welcome back. Looking forward to more banter. #ciscospchat
- 6:04 pm **markg\_cisco:** #ciscospchat Hey Mark Grayson here - so what's one everyone's mind post MWC?
- 6:06 pm **MsMobileConverg:** @kshatzka thank you so much for having me, happy to be in this space #ciscospchat
- 6:06 pm **kshatzka:** @markg\_cisco #ciscospchat Mark - the Motorola Xoom is on my mind. First tablet that seems more than just a consumption device
- 6:06 pm **markg\_cisco:** #ciscospchat So the crowds were certainly back - especially around the Android booth! :-D

6:07 pm **markg\_cisco:** #ciscopchat but then I also heard lots about optimization of network infrastructure, and of course video

6:08 pm **kshatzka:** #ciscopchat @markg\_cisco The "new every two" model that carriers in the US use won't be sufficient for smartphones. New every 1?

6:08 pm **MsMobileConverg:** @markg\_cisco cause #android rocks! #ciscopchat

6:09 pm **kshatzka:** @MsMobileConverg #ciscopchat Maybe "new every 3 months" with Android. Verizon is rolling out 6-8 new Android phones per Q

6:09 pm **juan\_diaz\_diaz:** Good afternoon. #ciscopchat

6:10 pm **MsMobileConverg:** @markg\_cisco optimization? video? - would like to hear!! waht happened at #mwc11 #ciscopchat

6:10 pm **kshatzka:** @Teresacottam #ciscopchat I am interested in the BSS space quite a bit. Thanks for the link

6:11 pm **MsMobileConverg:** @kshatzka #ciscopchat - sometimes too many phone choices will thin your suppliers & their bottom - nt necessarily good 4 their economy...

6:11 pm **markg\_cisco:** What did folks think of the WiFi coverage? 1TB of traffic offloaded in the first 3 days. I make that 100 heavily loaded APs! #ciscopchat

6:12 pm **Teresacottam:** @kshatzka You are welcome. The feedback was very positive: lots of quality traffic. However no overarching theme for us #BSSOSS #ciscopchat

6:13 pm **kshatzka:** @markg\_cisco #ciscopchat I bet the mobile SPs were happy to see that. Were there pico deployed at the show, as well, by local carriers?

6:14 pm **Teresacottam:** @markg\_cisco There was a lot of complaints about WiFi - the call quality on mobile & WiFi wasn't good. Embarrassing really. #ciscopchat

6:15 pm **juan\_diaz\_diaz:** #wifi worked fine the 1st day. and just jumping in and out the rest of the show. Bu was a welcomed improvement #ciscopchat

6:16 pm **markg\_cisco:** @Teresacottam yeah we had the guys troubleshooting - a huge number of associations on some particular APs #ciscopchat

6:16 pm **CiscoSPMobility:** @juan\_diaz\_diaz Welcome! What are some mobility issues on top of your mind now? #ciscopchat

6:16 pm **juan\_diaz\_diaz:** Still remembering the Cannes and Earlier bcn editions when the issues was just voice or 3G signal #ciscopchat

6:16 pm **rgruia:** #ciscopchat Hello everyone; sorry I was a bit late but my noon time went OT - cascading effect ;-)

6:16 pm **Teresacottam:** @kshatzka @markg\_cisco #MWC11 was maybe a microcosm of #capcrunch which was also getting a lot of attention on macro scale! #ciscopchat

6:16 pm **kshatzka:** @markg\_cisco #ciscopchat Like the AP near the Android booth? :-)

6:17 pm **juan\_diaz\_diaz:** Still thinking that the main issue is the unavailability of a down to earth priced roaming data plan #ciscopchat

6:17 pm **markg\_cisco:** But then I guess that's the future we are all going to face - how to handle massive amounts of traffic? #ciscopchat

6:17 pm **juan\_diaz\_diaz:** neither pico nor fempto visible at the #mwc11 #ciscopchat

6:17 pm **rgruia:** #ciscopchat @markg\_cisco WiFi was good in a few areas, spotty in others - luckily I had it at the Cisco and Amdocs booths on my Torch

6:18 pm **MsMobileConverg:** @rgruia welcome ... you have landed! it's all good! #ciscopchat

6:18 pm **juan\_diaz\_diaz:** For me battery capacity and data plan pricing are the issues. The mobile experience needs to beat the at-your-home expeience #ciscopchat

6:19 pm **Teresacottam:** @juan\_diaz\_diaz Yes <roaming data plan is main issue> People who were eg tweeting burnt thro their plans v quickly #ciscopchat #MWC11

6:19 pm **kshatzka:** @juan\_diaz\_diaz #ciscopchat it is very difficult to find the right roaming data costs when carrier costs (OPEX) are so vastly different

6:20 pm **rgruia:** #ciscopchat @juan\_diaz\_diaz I cannot say I miss Cannes considering the space crunch there - Barça a lot better (though I like Atletico)

6:20 pm **markg\_cisco:** @juan\_diaz\_diaz - you mean in production or in the show? I thought some of the femto zone ppts wer pretty good. #ciscopchat

6:20 pm **juan\_diaz\_diaz:** @markg\_cisco sure. as people mobilize their internet experience the always on will be the norm. #ciscopchat

6:20 pm **neiltwitz:** Good afternoon, ladies and gents !! #ciscospchat

6:20 pm **MsMobileConverg:** @juan\_diaz\_diaz yes! people EXPECT to have the same experience they have on #fixedline #ciscospchat

6:21 pm **juan\_diaz\_diaz:** @markg\_cisco and datatransfer will be in the close to gigabyte daily, at least, for each and every user #ciscospchat

6:21 pm **neiltwitz:** WiFi as an offloading alternative is good for 3G but might not be good for 4G speeds from UX point of view #ciscospchat

6:21 pm **markg\_cisco:** We presented the results of a study we did with ABI at MWC. Why when cost of production <\$5/GB do they charge roamers \$500./GB #ciscospchat

6:21 pm **rgruia:** #ciscospchat Policy control was one big topic - interesting to see also some other vendors making a foray into this space (e.g. APKT & SVC)

6:22 pm **juan\_diaz\_diaz:** @Teresacottam roaming is SO expensive that i just cut 3g when abroad and just sync and conect when on a #wifi area #ciscospchat

6:22 pm **neiltwitz:** WiFi (802.11b/g) as an offloading alternative is good for 3G but may not for 4G speeds from UX point of view #ciscospchat

6:22 pm **kshatzka:** @neiltwitz #ciscospchat Did you see that Intel announced they've figured out full-duplex WiFi?

6:23 pm **juan\_diaz\_diaz:** @kshatzka sure, but the actual cost lets small self un employees out of 3g uberconnection when traveling #ciscospchat

6:23 pm **Teresacottam:** There was fantastic response from operators reported by policy control vendors at #MWC11 #ciscospchat #BSSOSS

6:23 pm **rgruia:** #ciscospchat I wonder if you get a better WiFi coverage if you turn off the other radio (did it sometimes; had a Vodafone Spain prepaid SIM)

6:23 pm **markg\_cisco:** @neiltwitz - but I also hear that LTE only gives 2x improvement, so with more Hz lets say x4 overall. #ciscospchat

6:23 pm **kshatzka:** @juan\_diaz\_diaz #ciscospchat At least there's WiFi in your device. As recent as 24 months ago, you had to wait until your laptop was up

6:23 pm **pnjarich:** @juan\_diaz\_diaz gotta disagree on the femto and pico fronts. they were everywhere - > 2X the news of standard RAN news. #mwc11 #ciscospchat

6:23 pm **juan\_diaz\_diaz:** @neiltwitz yes, and with #wifi there are added security, mobility and capacity issues #ciscospchat

6:23 pm **MsMobileConverg:** @markg\_cisco and what did they say about their gouging of roaming \$ ? #ciscospchat ... because they can???

6:24 pm **Teresacottam:** @juan\_diaz\_diaz A lot of our #BSSOSS folk had Spanish SIMs at the ready it's like 2005 again. <roaming charges> #ciscospchat

6:25 pm **juan\_diaz\_diaz:** @markg\_cisco my current operator roaming costs are so... undescriptible over 10euro per Mb (yes megabyte). try to do video #ciscospchat

6:25 pm **markg\_cisco:** @rgruia FemtoForum did some analysis - and "it depends". If front end filters are good, then its not an issue. #ciscospchat

6:25 pm **MsMobileConverg:** @juan\_diaz\_diaz @neiltwitz yes #wifi has its security issues - but how and how many are hacked that way? do we know? #ciscospchat

6:25 pm **rgruia:** #ciscospchat Just curious if there are any ex-Starent folks here; wanted to get their take on Juniper's assumptions re. core tenders...

6:27 pm **markg\_cisco:** @Teresacottam @juan\_diaz\_diaz Yeah - I first saw those dual SIM phones in India - but looks like they are now going mainstream. #ciscospchat

6:27 pm **kshatzka:** @rgruia #ciscospchat Go ahead and ask. I am legacy Cisco, but we did have mobile packet core technology pre-Starent, as well

6:27 pm **Teresacottam:** The big news of #MWC11 was Nokia Microsoft. There were lots of bad jokes about this and lots of deb around industry dynamics #ciscospchat

6:28 pm **rgruia:** #ciscospchat @markg\_cisco IMHO femtos need to be near the US\$100/box figure in order to be a success;getting there due to economies of scale

6:28 pm **juan\_diaz\_diaz:** @MsMobileConverg @markg\_cisco yes, think that this is the reason. as they have a monopoly and the are not yet any alternative #ciscospchat

6:29 pm **kshatzka:** @Teresacottam #ciscospchat I skipped MWC. Was actually in Redmond with MSFT. There's excitement in the air around that partnership

6:29 pm **MsMobileConverg:** @markg\_cisco @Teresacottam @juan\_diaz\_diaz it is my understanding that sims will be chippy/software rather than physical cards #ciscospchat

6:29 pm **markg\_cisco:** @Teresacottam Right - NOK/MSFT is a H/W-S/W tie up when everyone else is talking ecosystems. #ciscospchat

6:29 pm **juan\_diaz\_diaz:** @Teresacottam @juan\_diaz\_diaz when i go abroad at the same country for more than 3 days i buy a local sim too #ciscospchat

6:29 pm **Teresacottam:** @domtsmith made a really good point about how everyone pre-announced stuff this year at #MWC11 - new marketing trend? #ciscospchat

6:30 pm **kshatzka:** @rgruia #ciscospchat In my opinion, femtos need to be near the US\$0 figure in order to be a success. People don't want to pay for coverage

6:30 pm **juan\_diaz\_diaz:** @Teresacottam but many times my trips are just 1-2 days long and each time are to a different country #ciscospchat

6:30 pm **neiltwitz:** @juan\_diaz\_diaz Agreed !! This Justifies Intel investing in firms like McAfee to push security soln in mobile space #ciscospchat

6:30 pm **juan\_diaz\_diaz:** @Teresacottam i cant have (pay) 8-10 different sims #ciscospchat

6:31 pm **rgruia:** #ciscospchat @kshatzka Just wondering if most 3G packet core tenders using GGSN, SGSN- will need to be re-bid for 4G -what % will be in play

6:31 pm **MsMobileConverg:** @juan\_diaz\_diaz @Teresacottam I too buy local sim and #wifi when abroad #ciscospchat we should have a single-use global

6:31 pm **neiltwitz:** @markg\_cisco @kshatzkaThe reason being there will be a gap in UX unless we have MIMO 802.11n to match to 4G speeds #ciscospchat

6:31 pm **markg\_cisco:** @kshatzka @rgruia : that is a price to the consumer - not the carrier ASP. Still our ABI analysis looked at both models. #ciscospchat

6:31 pm **juan\_diaz\_diaz:** @MsMobileConverg i know some people that been hacked on open wifi nets here. the easy firefox hack to scoop on open sessions #ciscospchat

6:32 pm **FTS\_Billing:** Agreed RT @Teresacottam There was fantastic response from operators reported by policy control vendors at #MWC11 #ciscospchat #BSSOSS

6:32 pm **Teresacottam:** Also the @keimalimited guys all made us laugh with their challenge 2 alcau <http://twitpic.com/404pj7> #ciscospchat #mwc11

6:32 pm **juan\_diaz\_diaz:** @markg\_cisco in China they are common too. some years ago i used to carry 2-3 mobile phones just to call each operator #ciscospchat

6:33 pm **kshatzka:** @rgruia #ciscospchat I would say that many are "in play" - SGSN->MME, and the PGW/SGW infrastructure. But incumbents have distinct advantage

6:33 pm **markg\_cisco:** @rgruia @kshatzka : so would say that they are in play, but you need legacy support 2G/3G/4G -> GW and Control (IMO). #ciscospchat

6:33 pm **juan\_diaz\_diaz:** @markg\_cisco as calls between same operator users where way cheaper that calls from one to another #ciscospchat

6:33 pm **kshatzka:** @rgruia #ciscospchat Collapsing 3G and LTE over same common core has advantages from an inter-tech mobility and user experience perspective

6:34 pm **rgruia:** #ciscospchat @kshatzka @markg\_cisco True, people want to have that subsidized - and "shared network" biz models don't work (e.g. BT FON)

6:34 pm **juan\_diaz\_diaz:** @Teresacottam i went to the #nokia press event and went back extremely disapointed. bad crisis control sesion #ciscospchat

6:35 pm **MsMobileConverg:** @rgruia @kshatzka @markg\_cisco "shared biz models" only good for they at the bottom ... #ciscospchat

6:36 pm **Ew4n:** 35 minutes late. I was out buying batteries for my Apple Mouse. Sorry! #ciscospchat

6:36 pm **markg\_cisco:** #ciscospchat Thanks for some great tweets. See you next time.

6:37 pm **kshatzka:** @Ew4n #ciscospchat 35 mins late to a 30 min session :-)) I think we are just wrapping up. I am here for a few more minutes.

6:37 pm **rgruia:** #ciscospchat @kshatzka @markg\_cisco The reason I ask is that JNPR must believe that there will be churn - w/ MobileNext they will forego...

6:37 pm **MsMobileConverg:** @markg\_cisco Mark, are you saying the #twitterchat #tweechat #ciscospchat is over?????

6:37 pm **Teresacottam:** @juan\_diaz\_diaz The No-Win jibe is pretty cruel tho - they kept saying IBM was dead in the 90s. Still life in the old dogs yet. #ciscospchat

6:37 pm **juan\_diaz\_diaz:** For urban areas and campuses-industrial areas, there is the opportunity for incumbents to offer #wifi alternative to 3g-4g #ciscospchat

6:37 pm **neiltwitz:** @markg\_cisco @Teresacottam @juan\_diaz\_diaz Yes dual-sim a hot trend constitutes to 80% of microvendors' portfolio #ciscospchat

6:37 pm **Ew4n:** I interviewed @Amdocs and @FTS\_Billing on camera at MWC re #BSSOSS; missed out on the Cisco chaps though #ciscospchat

6:38 pm **rgruia:** #ciscospchat @kshatzka @markg\_cisco ... some of their Ericsson revenue, no? So they must hope to more than make that up...

6:38 pm **MsMobileConverg:** @Ew4n hello Ewan! #ciscospchat

6:38 pm **juan\_diaz\_diaz:** But they have to deal w regulatory issues and capacity management #ciscospchat

6:38 pm **juan\_diaz\_diaz:** And also a way to finance-profit the operation #ciscospchat

6:38 pm **Ew4n:** @kshatzka oh no I've missed it all! #ciscospchat

6:39 pm **Teresacottam:** (Chortle) The #ciscospchat is over and @Ew4n only just got here!

6:39 pm **rgruia:** #ciscospchat @kshatzka @markg\_cisco EPC TAM will grow from \$1.9B in 2010 to \$3.3B by 2014 - so that's also a driver...

6:39 pm **Ew4n:** @MsMobileConverg hellooo! #ciscospchat

6:39 pm **kshatzka:** #ciscospchat The most interesting news at MWC this year was the release of Building the Mobile Internet, by Cisco Press (shameless plug) :-)

6:39 pm **juan\_diaz\_diaz:** And also a way to finance-profit the operation #ciscospchat #ciscospchat

6:39 pm **Ew4n:** @Teresacottam oh no! How annoying! It's only 30 odd minutes? #ciscospchat

6:40 pm **MsMobileConverg:** @Ew4n No, we are still here! We count, just read the timeline and join in, we'll hang and chat #ciscospchat for a moment longer!

6:40 pm **kshatzka:** @Teresacottam @Ew4n #ciscospchat I am sticking around for a little while longer

6:40 pm **bobegan:** Press assumption RT @markg\_cisco: @Teresacottam Right - NOK/MSFT is a H/W-S/W tie up when everyone else is talking ecosystems. #ciscospchat

6:40 pm **Ew4n:** What did I miss from the #ciscospchat then? A rollercoaster of a ride?

6:41 pm **MsMobileConverg:** @kshatzka and what a fabulous shameless plug Do go on! #ciscospchat!

6:41 pm **rgruia:** #ciscospchat @kshatzka @markg\_cisco Once you packetize voice, there are some interesting possibilities - have you checked Twilio?

6:41 pm **juan\_diaz\_diaz:** The tweetchat page is not updating fine #ciscospchat

6:42 pm **Teresacottam:** @Ew4n Yeah time just goes so much quicker when ur outside #BSSOSS...I hate roaming... :-)

6:42 pm **kshatzka:** @Ew4n #ciscospchat So, what were your impressions of MWC? Anything innovative that you didn't expect?

6:42 pm **neiltwitz:** @MsMobileConverg @juan\_diaz\_diaz @neiltwitz Opportunities galore but the no.of hackers in mob'e space are still limited #ciscospchat

6:42 pm **Ubiquisys:** RT @rgruia: #ciscospchat @markg\_cisco IMHO femtos need to be near the US\$100/box - already below that today, hence SoftBank free offer.

6:43 pm **MsMobileConverg:** @kshatzka at #mwc11 what was the word on #video? #ciscospchat so much to do in that space! with that b2b b2c c2c b2... c2...d2...

6:43 pm **rgruia:** #ciscospchat @Teresacottam LOL ;-) Loved your <http://twitpic.com/404pj7> link - just curious who these @keimalimited guys are - great humor!

6:43 pm **Ew4n:** @kshatzka #ciscospchat I was actually rather impressed by the @FTS\_Billing user-user provisioning demo!

6:43 pm **Ew4n:** @Teresacottam this is it, I look away and boom, an entire #ciscospchat has taken place without me

6:43 pm **Ew4n:** @kshatzka er, i mean to say 'end-user provisioning' #ciscospchat

6:44 pm **kshatzka:** @MsMobileConverg #ciscospchat Mark and I wrote a 2nd book. looking at mobility across the TCP/IP protocol stack, from datalink to app layer

6:45 pm **Teresacottam:** @rgruia @keimalimited <loved ur picture <http://twitpic.com/404pj7> > They're Welsh network planners... Wait there's another one! #ciscospchat

6:46 pm **juan\_diaz\_diaz:** @kshatzka yes, the solar powered #android phone #ciscospchat

6:46 pm **juan\_diaz\_diaz:** @kshatzka and the move to ip communications #ciscospchat

6:46 pm **rgruia:** #ciscospchat @Teresacottam I will have to share that with Sir Terry (our most successful Canadian tech entrepreneur & also from Wales) ;-)

6:47 pm **kshatzka:** @Ew4n #ciscospchat All the databases (policy, identity, service) in mobile is too complex. Orchestration of BSS is ripe with opportunity.

6:47 pm **Teresacottam:** @Teresacottam @rgruia <http://twitpic.com/40cuhs> This is the network \*fully\* deployed! #ciscospchat @keimalimited

6:47 pm **MsMobileConverg:** @Ew4n you've been here with us in the #ciscospchat in spirit the entire time!

6:47 pm **kshatzka:** @juan\_diaz\_diaz #ciscospchat That was our first book - IP Design for Mobile Networks

6:47 pm **MsMobileConverg:** @kshatzka sounds like a fab paper! #ciscospchat

6:48 pm **rgruia:** #ciscospchat @Teresacottam Great photos for sure - they probably can use these legos to demo multi-path propagation / interference, etc. ;-)

6:48 pm **CiscoSPMobility:** Thanks everyone for joining #ciscospchat. Stay tuned for future ones! Have a fantastic weekend!

6:49 pm **Teresacottam:** @rgruia Glad it made u laugh we were all chortling! U need a sense of humour in network planning! @keimalimited #ciscospchat #BSSOSS

6:49 pm **kshatzka:** @MsMobileConverg #ciscospchat A light 500 pages of reading!

6:49 pm **MsMobileConverg:** @Teresacottam omg girl, ur pics are sooooo funny! lol! #ciscospchat

6:51 pm **MsMobileConverg:** @kshatzka available for my #droidx on kindle app? #ciscospchat

6:51 pm **Teresacottam:** @MsMobileConverg I can't take credit it was the @keimalimited guys but feel free 2 pass on! #ciscospchat We like a good old laugh in #BSSOSS

6:51 pm **rgruia:** #ciscospchat @Ubiquisys I heard you are now licensing your own software as well as having your own hardware, which further lowers costs

6:51 pm **Ew4n:** @kshatzka #ciscospchat I'm looking forward to seeing a lot more in that regard

6:52 pm **Ew4n:** @MsMobileConverg #ciscospchat absolutely! :D

6:53 pm **MsMobileConverg:** Okay #ciscospchat so r u telling me #video deployment has not yet been settled 4 #mobile #audience? We r still relegated to 1-2 min o fun?

6:53 pm **neiltwitz:** @MsMobileConverg @Teresacottam Haha !! Is there a Cell boundary there?? <http://twitpic.com/40cuhs> #ciscospchat

6:54 pm **kshatzka:** @MsMobileConverg #ciscospchat Yep - both books are available on Kindle.

6:54 pm **Teresacottam:** Thanks so much everyone 4 a gt #ciscospchat - must dash & grab more coffee b4 I fall asleep (need more battery power!) :-)

6:54 pm **rgruia:** #ciscospchat @Teresacottam @keimalimited Well, I'm also a big Tottenham fan & have been enjoying the great season Gareth Bale's been having

6:54 pm **rgruia:** #ciscospchat @Teresacottam @keimalimited Hope he stays on at White Heart Lane; IMHO the best Welsh player ever (better than Giggs & Rush)

6:55 pm **MsMobileConverg:** @Teresacottam thank you for joining and for the phototainment! #ciscospchat

6:56 pm **MsMobileConverg:** @neiltwitz @Teresacottam hahaha no cell boundries, 'tis a perfect boundryless celltopia! #ciscospchat

6:56 pm **Teresacottam:** @rgruia @keimalimited Oh now you have lost me ronald I only understand the game with the funny shaped ball! #ciscospchat

6:57 pm **kshatzka:** #ciscospchat Thanks all. Great tweetchat. Will see you all next time. Off to figure out how to make wireless work better...

6:58 pm **MsMobileConverg:** Thank you #ciscospchat @CiscoSPMobility always such a wonderful time

6:58 pm **Teresacottam:** @MsMobileConverg @neiltwitz What's even better: the MNO doesn't have a billing sys = free roaming! :-)  
#ciscospchat #BSSOSS @keimalimited

6:59 pm **rgruia:** #ciscospchat @Teresacottam @keimalimited I'm Brazilian, so it goes w/ the territory ;-)  
But now an ex-pat living in Canada so get EPL here

- 6:59 pm **MsMobileConverg:** @kshatzka yes, do figure out how to make #wireless work better...! Our #audience and #clients are WAITING FOR MORE!!! #ciscospchat
- 7:03 pm **MsMobileConverg:** #ciscospchat - you make Thursdays #FABULOUS!
- 7:06 pm **CiscoSPMobility:** @MsMobileConverg Thank you. :) I think you're a great contributor to these Thursday #ciscospchat sessions, so we have you to thank.
- 7:11 pm **MsMobileConverg:** Thank U 4 lively afternoon #ciscospchat @kshatzka @rguia @teresacottam @neilwitz @Ew4n @juan\_diaz @ubiquisys @markg\_cisco @CiscoSPMobility
- 7:47 pm **dougnewdick:** RT @Teresacottam: There was fantastic response from operators reported by policy control vendors at #MWC11 #ciscospchat #BSSOSS
