STEALTHWATCH® SYSTEM V6.5X CONFIGURATION CHECKLIST, CONTINUED

✓	Step	Task	Reference or Path
	6	Launch the Appliance Admin interface for each product and configure these general settings:	https://[product IP address] (For the SMC, click **Administer this server** after the above Web page loads.)
		▶ Configure the System Time	▶ Configuration > System Time and NTP
		▶ Change the Admin Password	▶ Configuration > Change Password
		▶ Configure the FlowSensor Application ID and Payload (if applicable)	▶ Configuration > Advanced Settings
		▶ Configure Flow Replicator Rules (if applicable)	▶ Configuration > Forwarding Rules
	7	Launch the SMC client software from the Web App interface and configure the following settings:	https://[SMC IP address]
		▶ Verify that the SMC is seeing traffic.	In the Enterprise tree, right-click the domain, and then select Traffic > Domain Traffic from the pop-up menu.
		▶ Create an Admin User account	Configuration > User Management
		▶ Add an Identity device (if applicable)	In Enterprise tree, right-click Identity Services, and then select Configuration > Add StealthWatch ID Appliance or Add Cisco ISE.
		▶ Add SLIC Threat Feed feature (if applicable)	In the Enterprise tree, right-click the StealthWatch Labs Intelligence Center branch and select Configuration > SLIC Threat Feed Configuration.
		▶ Place all default IP space for the network into the Catch All host group.	*SMC User Guide*
