For updated Room systems portfolio overview and positioning, check my community post → [here](#)

Includes document with all options (Room and Personal systems) and useful summary/resources

Meeting Room Video Endpoints options (for both on-premises and Spark cloud):

a) All-in-one (codec, camera, displays, speakers)

In case you want all-in-one approach. There are various options: single or dual screens, floor/wheel or wall mounting, speakertrack feature. Some models have also integrated microphones.

In this category, we have :

Room 55 (55" display) for small/medium rooms * latest addition in portfolio *
[Cisco Spark Room 55 Data Sheet](#)
<https://communities.cisco.com/docs/DOC-75386>
Room 55 offer speaker track feature by default via its digital camera.

MX700 (dual 55 inch display) and MX800 (single or dual 70 inch display) for medium/large rooms
[Cisco TelePresence MX700 & MX800 Data Sheet](#)
MX700 dual screen can be selected with two cameras for speakertrack feature. MX800 single screen can be selected with two cameras for speakertrack feature. MX800 dual screen comes with two cameras for speakertrack feature by default.

Room 70 Single (70" display) and Room 70 Dual (dual 70" display) for medium/large rooms * latest addition in portfolio *
[Cisco Spark Room 70 Data Sheet](#)
Single and Dual display options. Both offered with Speakertrack feature by default via their digital camera.

b) Integration Codec (connects to external display or projector)

In case you want to use to existing display or projector.

In this category, we have :

SX10 quickset for small rooms

Room Kit for small/medium rooms * latest addition in portfolio *

[Cisco Spark Room Kit Data Sheet](#)

Room kit has two HDMI outputs for display connection (one for video and one for presentation). Comes by default with touch panel. It supports by default speaker track (optimum use for rooms up to 6m). Has integrated speakers and microphones (also supports external microphones).

Room Kit Plus for medium/large rooms * latest addition in portfolio *

[Cisco Spark Room Kit Plus Data Sheet](#)

Room kit has two HDMI outputs for display connection (one for video and one for presentation). Comes by default with touch panel. It supports by default speaker track (optimum use for rooms up to 6m). Has integrated speakers. It requires external microphones.

Room Kit Plus with Precision 60 camera for medium/large rooms * latest addition in portfolio *

[Cisco Spark Room Kit Plus Precision 60 Data Sheet](#)

Offers same features as Room Kit Plus (HDMI, speakerphones, ext microphones, etc). Main difference from standard Room Kit Plus offering is that Precision 60 camera provides maximum flexibility in scenarios where you need special camera placement, objects close up, or wide pan/tilt/zoom capability. But it does not support Speakertrack feature.

Sx20N-P40 quickset for small/medium rooms and SX20N-12x quickset for medium/large rooms
