Become a Delegated Administrator

Your company has not established a **Delegated Administrator**, which is required to enable many services including the Smart Net Total Care portal. The Delegated Administrator has the responsibility to grant Smart Net Total Care portal access to additional users or administrators in your company. If there is someone else who has access management responsibility for your entire company, you should have them register to become the Delegated Administrator.

To become a Delegated Administrator, select the organization below that best represents your scope of authority for managing users. If you have responsibility for managing across your entire organization, choose the first entry in the list. If you have responsibility for a specific site, select the appropriate entry in the list and click 'Submit' to proceed with registration.

If you believe your company does not show on the list below, click 'Back' to return to the previous page and try another contract and serial number. If you still cannot find the company that represents your scope of authority, choose 'None of the above' and a Cisco agent will investigate your request.

- IRB BRASIL RESSEGUROS SA
AVENIDA MARECHAL CAMARA 171
RIO DE JANEIRO RJ BR
- IRB BRASIL RESSEGUROS SA
MARECHAL CAMARA 171
SAO PAULO SP BR
