

Assembly and Installation

Display Installation

This cart has been designed specifically for the Cisco Telepresence MX200 flat panel display. It is not recommended that any other display be used to mount on this cart.

⚠ WARNING: Before attaching display to cart, set the brakes on the back wheels by pressing down on the tabs to prevent instability that could result in possible injury.

Carefully slide display onto column assembly (D).

⚠ WARNING: Two people are required to lift the chassis. To prevent injury, keep your back straight and lift with your legs, not your back. *Statement 164*

1. Attach display to the cart assembly using four M6x40mm socket head cap screws (F).

NOTE: Using screws of improper length or diameter may damage display! Only use screws provided with mount!
