New Features, Device Support, Training, & Videos

August 2012

New Features – Release 7.4

Multi-VLAN Discovery:
> *OnPlus now supports the discovery of multiple VLANs. VLAN discovery provides network connectivity and device discovery across multiple VLANs. The ON100 will self-provision to receive VLANs when it is connected into a standard IEEE 802.1q trunked interface.*

OnPlus Wireless Management Application:
> *Provides the ability to create, schedule, and store wireless reports to provide valuable insight into wireless deployments. New reports available: Wireless Access Point Summary Report, Access Point Status History, Client Association History Total, Client Association History by AP, Traffic History Total, and Traffic History by AP.*

Discovery Process enhanced to minimize errors on Windows Devices:
> *OnPlus will now discover devices using 'anonymous' rather than 'root'. Additionally, a new option is available to disable SMB (Windows Device) discovery, or provide Active Directory credentials for Windows Devices.*

Tablet Native App
> *OnPlus mobile access in addition to the Smartphone app for Android & Apple iPhone, it is now a specific native app for Android tablets. A native app for iPad will be available in the next release, currently the iPhone app can be accessed on an iPad.*

New Device Support

Catalyst 3560
> *Backup and Restore configuration, Firmware upgrade (except for 3560 and 3560-G)*
> *Catalyst 3560-C, 3560-E, 3560-G, 3560-X, 3560v2 provide product icons and support remote access*

SF500 & SG500 Series Switches
> *Icon display, Backup and Restore configuration, Firmware upgrade, and Remote connectivity*

Catalyst 2960-C
> *Backup and Restore configuration, Firmware upgrades*

3900 ISR G2
> *Backup and Restore configuration, Firmware upgrade, and Remote connectivity*

Training Module Updates

- Entering Cisco Credentials
- Monitors
- Sub-Agents
- Customer Accounts
- Firmware Updates
- PSA Integrations
- Reports
- Adjusting Topology
- Notification
- Backup Configurations
- Configuring NTOP
