

```

interface GigabitEthernet0/0/1
no ip address
media-type rj45
negotiation auto
service instance 501 ethernet
encapsulation dot1q 501 second-dot1q 101-104
rewrite ingress tag pop 1 symmetric

```

Only wants to see
VLAN's 101-104 for
their respective site.

Which is correct?

```

interface GigabitEthernet0/0/1
no ip address
media-type rj45
negotiation auto
service instance 501 ethernet
encapsulation dot1q 501 second-dot1q 101-104
service instance 502 ethernet
encapsulation dot1q 502 second-dot1q 101-104

```

```

interface GigabitEthernet0/0/1
no ip address
media-type rj45
negotiation auto
service instance 502 ethernet
encapsulation dot1q 101-104
rewrite ingress tag push dot1q 502 symmetric

```
