This option if you are receiving a Static IP from your ISP this is your ISP DNS that they specify for you only. You cannot place an optional DNS server.

Setup	Enable DHCP Server	The Router can be used as a DHCP (Dynamic Host
Dynamic IP	Client Lease Time 1440 Minutes Dynamic IP Range Range Start : 192.168.1.100 Range End : 192.168.1.149	Configuration Protocol) server on your network. A DHCP server assigns available IP addresses to each computer on your network automatically.
Static IP	Show unknown MAC addresses	
	Static Entry	
	Static IP Address:	
	MAC Address:	
	Name:	
	Enable:	
	Add to list	
	Delete selected Entry	
DNS	 Block MAC address on the list with wrong IP address Block MAC address not on the list DNS Server (Required) 1: 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0	

This option is if you have an internal DNS server and you would want your users PC to obtain your specify DNS server.

NOTE: You will need to have your DHCP Enabled for this feature.
