

All calls are routed via Windstream using the phone system gateway.  
 Now we want to set call routing in such a way that internet calls to rest of the offices are routed via Cisco 2911 & ATT

## Current LAX VOIP SYSTEM

- All calls are routed via Windstream using the phone system gateway.
- Now we want to set call routing in such a way that internet calls to rest of the offices are routed via Cisco 2911 & ATT
- Now Cisco 2921 will be doing all the routing, but it has a default gateway for ATT, which will allow the phone system to see rest of the phone systems available on MPLS but how will they route the outbound call using the SIP provider Windstream.

LAX

Rest of the Office
