IKE Proposals

IKE proposals specify the encryption algorithm, authentication algorithm and key exchange method that is used by this router when negotiating a VPN connection with the remote device. For the VPN connection to be established with the remote device, the remote device should be configured with at least one of the policies listed below.

Click the Add... button to add more policies and the Edit... button to edit an existing policy.

	Priority	Encryption	Hash	D-H Group	Authentication	Type
1	1	3DES	SHA_1	group2	FRE_SHARE	SDM Default
	2	3DES	MD5	group2	FRE_SHARE	User Defined

Add IKE Policy

Configure IKE Policy

Priority:	2	Authentication:	PRE_SHARE
Encryption:	3DES	D-H Group:	group2
Hash:	MD5	Lifetime:	8 0 0 HH:MM:SS

**VPN Wizard****Traffic to protect**

IPSec rules define the traffic, such as file transfers (FTP) and e-mail (SMTP) that will be protected by this VPN connection. Other data traffic will be sent unprotected to the remote device. You can protect all traffic between a particular source and destination subnet, or specify an IPSec rule that defines the traffic types to be protected.

- Protect all traffic between the following subnets

Local Network

Enter the IP address and subnet mask of the network where IPSec traffic originates.

IP Address:

10.20.2.0

Subnet Mask:

255.255.255.0

or

24

**Remote Network**

Enter the IP Address and Subnet Mask of the destination Network.

IP Address:

192.168.0.0

Subnet Mask:

255.255.255.0

or

24

- Create/Select an access-list for IPSec traffic
