

Cisco Multiparty Licensing

Benefits

- **Empower your entire organization to work together** with business-quality multiparty video collaboration that helps clients, partners, and customers connect face to face.
- **Increase productivity** with video, audio, web, and content-sharing tools that help you innovate and make better decisions faster.
- **Improve accessibility** to planned meetings and impromptu collaboration sessions.
- **Personalize and secure the experience** with customized profiles and PINs.

Keep Your Organization Connected and Productive

Today's office is diverse, fast-paced, and unconstrained by geography. But it's still as important as ever for employees to connect and collaborate. Maybe it's a one-on-one meeting between co-workers in separate offices. Or a brainstorming session with members of several different teams. No matter the situation or where people are located, being able to connect face to face is critical. You need to give your employees access to the video technology and communications tools that make these connections possible.

Now it's easy, with Cisco® Multiparty licensing for Cisco Meeting Server and Cisco TelePresence® Server. With cost-effective and easy-to-scale licensing, you can simplify video collaboration and make high-quality video meetings part of everyone's daily routine. Now with Cisco Meeting Server software, one platform enables high-quality video meetings but also scales for audio and web conferencing. In today's dynamic environment, anyone should be able to connect from anywhere. Cisco Meeting Server allows anyone to connect to a meeting with a video endpoint, Cisco Jabber, or with the Cisco Meeting App, which allows for extensive meeting reach from mobile devices, PC's, web browsers, or Skype for Business.

Deliver Personalized, High-Quality Multiparty Video Collaboration

Cisco Multiparty licenses are perpetual, all-in-one licensing giving customers all they need for video collaboration. They are available in two options: Personal Multiparty Plus and Shared Multiparty Plus (Table 1).

- Personal Multiparty Plus licenses, included with Cisco Unified Workspace Licensing (UWL) Meetings or available a la carte, each designate a single named host who can hold multiparty meetings at any time, for any number of participants.
- Shared Multiparty Plus licenses are available a la carte, and each supports one concurrent meeting. They can be shared among any number of users, offering an effective way to use shared room systems. You can even get a discounted price on Shared Multiparty licenses if they are purchased with video room systems. This price includes the Cisco Unified Communications Manager TelePresence Room system registration license.

Whether you choose Personal or Shared Multiparty Plus licenses, it's simple to set up meetings. You can provide every user with a dedicated, personalized meeting room (space), which is protected with a PIN.

All meeting participants can join easily from any standards-based, video-enabled device; from a mobile or desktop solution enabled by the Cisco Jabber® platform or the Cisco Meeting App; or from an audio-only phone. Whether people are working on a desktop or mobile device or using a room system, they can join a meeting from any location.

Additional features include:

- Cisco Expressway Rich Media Session (RMS) licenses, which enable:
 - Remote participant connectivity
 - Business-to-business (B2B) and business-to-consumer (B2C) connectivity
- Interoperability with third-party, standards-based video endpoints and Microsoft Lync/Skype for Business
- Convenient centralized management of all Multiparty licenses, Personal and Shared Multiparty Plus, for high efficiency and simplified maintenance and upgrades

Table 1. Cisco Multiparty Features and Comparison of License Levels

Feature and Function	Cisco Personal Multiparty Plus	Cisco Shared Multiparty Plus
Tied to a named host	Yes	No
Availability	Included with Cisco UWL Meetings or a la carte	A la carte or discounted with video room system
Minimum order	25 named host licenses	1 shared host license
Maximum conference size	Unrestricted, within the limit of available hardware capacity	
Does a named host need to be present in the conference?	Yes	No; any user can host a meeting

Feature and Function	Cisco Personal Multiparty Plus	Cisco Shared Multiparty Plus
Maximum resolution	1080p60 (full HD) video with separate content, single- or multiple-screen endpoints	
Rich Media Sessions for B2B or B2C	Included	Included
Cisco TelePresence Management Suite (TMS), TMS-XE, and Skype for Business/Lync interoperability	Included	New customers buy with Starter Pack
Support for impromptu escalation from Cisco Unified Communications Manager	Yes	Yes

Cisco Multiparty Ordering Information

Use Tables 2, 3, and 4 to order the licenses that work best for your business needs.

Table 2. Ordering Multiparty Licensing

Item	Part Number
New customer ordering Unified Workspace Licensing Meetings Per host	CUWL-10X-K9 or CUWL-11X-K9 (top level) NEW-UWL-10X-MTG or NEW-UWL-11X-MTG
Existing CUWL Pro customers or customers that currently have Personal Multiparty Basic or Advanced migrating to Personal Multiparty Plus (Current UCSS or SWSS support contract required)	CUWL-PMP+-K9 (Top Level) LIC-PMP-2-CMS with qty = UWL Pro covered by current support contract
Existing Cisco TelePresence Server screen licenses (8710, 7010, vTS, 300 Series) or MCU (5300, 8510, or 8420 PLU) convert to SMP Plus (Current UCSS or SWSS support contract required)	TP-SMP-SL2SMP (Top Level) LIC-TSorMCU-2-SMP+ With qty = UWL Pro covered by current support contract

Table 3. Cisco Shared Multiparty Plus Ordering

Item	Part Number
Shared Multiparty Plus (top level) a la carte licensing	TP-SMP-K9
Shared Multiparty Plus license for 1 concurrent meeting	LIC-TP-SMP
Shared Multiparty Starter Kit includes Conductor and TMS with 25 devices (recommended for new customers without UWL Meetings)	LIC-SMP-STARTERKIT
Purchase with Cisco TelePresence Room endpoint (SX/MX/IX Series)	
Shared Multiparty Plus license for 1 concurrent meeting	LIC-TP-SMP-EP (Option under video endpoint top-level SKU)

Table 4. Cisco Meeting Server Platforms

Platform	Part Number
Cisco Meeting Server 1000	<p>CTI-CMS-1K-BUN-K9 (Bundle: including appliance plus choose virtual edition Cisco Meeting Server or virtual Cisco TelePresence Server). VMware required; purchase with bundle optional.</p> <p>CTI-CMS-1000-K9 (Appliance/server without software)</p> <p>R-CMS-K9 (Virtual Cisco Meeting Server activation key)</p> <p>or</p> <p>R-VTS-K9 (Virtual Cisco TelePresence Server activation key)</p>

Designed to Scale with Your Business Growth

Cisco Multiparty licenses include:

- Cisco Meeting Server with Cisco Meeting App or
- Cisco TelePresence Server with Cisco TelePresence Conductor

Cisco TelePresence Management Suite (TMS), TMS-XE for scheduling with Outlook/Exchange, TMS Provisioning Extension (TMSPE), Cisco Expressway Rich Media Sessions, and Microsoft Lync/Skype for Business interoperability

All Cisco TelePresence products are available as virtualized solutions that can be deployed on Cisco Unified Computing System™ (Cisco UCS®) servers or reside jointly with Cisco Business Edition 6000 or 7000 Series (BE6000 or BE7000).

Meetings can scale easily to include any number of participants, up to the available capacity of the Cisco video conferencing platforms deployed. You no longer need to calculate the number of port licenses required to handle everyday meetings; everything is licensed per meeting now. As usage grows, just add new Cisco Meeting Server platforms.
