peer-keepalive
destination
171.100.1.2 source
171.100.1.1
delay restore 150

Vendor/MPLS

## IP X.X.X.X

We experienced
Cisco Bug:
CSCus68610 Nexus 5672/56128
- Hang or silent
reset, uC reset
code: 0x4800 or
0x400b

On SW1. When we lost connectivity to IP x.x.x.x, we lost connectivity to our LAN. Is it possible to in corporate IP x.x.x.x into VPC? Add another physical interface to vendor/MPLS?
