

**Goal #1**

**INBOUND:** Third Party Vendor needs access to Branch server from outside, no VPN. Branch Server will be reachable via **ISP1 at 11.11.11.33** from outside. cEdge will translate those Destination packets from **11.11.11.33** to 192.168.1.1.

Branch

**Goal #2**

**OUTBOUND:** The cEdge will Responed back and translate the Source IP from 192.168.1.1 to 11.11.11.33.
