Touch10 Wall Mount Development

Cisco makes the Touch10 simple to use.

RoomReady makes the Touch10 simple to house by allowing it to live securely tucked into your wall.

We all agree that the best use of technology is in a supporting role. It should always empower collaboration and never be in your way.

Gain more space and feel confident moving the Touch10 from your table to your wall knowing it will be securely held while maintaining Cisco's form and aesthetic.

While the renders are shown in black, RoomReady's Touch10 Wall Mount will hold a complementary white slightly matted finish.

In the final stages of development, the Touch10 Wall Mount is planned to ship mid to late January 2016.
