VoiP-Cards

Due to the support of wide spread standards such as the SIP or IAX protocol various VoIP telephones or entire VoIP telephone systems can be connected to the Intercom System as subscribers on the following VoIP cards.

G8-IAX	
With the VoIP Card G8-IAX up to 8 Trunk connections from IP-Intercom Servers to VoIP Servers, which support the IAX2 protocol, can be established. This interface allows calls between Intercom stations and VoIP phones and vice versa. With the basic card G8-IAX-4B four connections with feature level B can be established. An upgrade to 8 connections and the individual feature levels can be activated with a licence code.	
Licences for basic card G8-IAX-4B L8-IAX-4C Upgrade to G8-IAX-4C L8-IAX-4D Upgrade to G8-IAX-4D L8-IAX-8B Upgrade to G8-IAX-8B L8-IAX-8C Upgrade to G8-IAX-8C L8-IAX-8D Upgrade to G8-IAX-8D
