Unified CM Database Status

Provides a snapshot of the Unified CM database health. This report can be useful to monitor periodically, and should be used to ensure the database is healthy before an upgrade.
Created on Mon Sep 06 15:40:39 CEST 2010

Unified CM Cluster Name
Lists the cluster name from the Enterprise Parameter and the publisher server name/IP.

Cluster Name	Publisher Name/IP
StandAloneCluster	ittrn-cmpub01

Unified CM Database Access
For every server, shows if you can read from the local and publisher databases.
Local and publisher databases accessible.
⊟*View Details*

Server ▲▼	Publisher DB Reachable ▲▼	Local DB Reachable ▲▼
10.254.56.11	true	true
10.254.56.12	true	true

Unified CM Database Status
Shows if replication is good or bad.
RTMT Counter Information
Connection to RTMT on 10.254.56.12 could not be established
All servers do not have a replication count of 427.
Not all servers have a good replication status. See the details.
⊟*View Details*

Server ▲▼	Number of Replicates Created ▲▼	Replicate_State ▲▼
10.254.56.11	0	0 - initializing
10.254.56.12	N/A	N/A

See also Database Summary Screen in RTMT.
Run CLI command (show tech dbstateinfo) for more detail.
Replication Server List (cdr list serv) from every server for debugging purposes only.
⊟*View Details*

Unified CM Hosts

Checks the contents of the hosts file on each installed server and returns a summary checking to see if they are equivalent.

🚫 The host file on 10.254.56.12 does not match the publisher.

⊟*View Details*

Server ▲▼	Host Information ▲▼
10.254.56.11	#This file was generated by the /etc/hosts cluster manager. #It is automatically updated as nodes are added, changed, removed from the cluster. 127.0.0.1 localhost ::1 localhost 10.254.56.11 ittrn-cmpub01.adagnet.net ittrn-cmpub01 10.254.56.12 ittrn-cmsub01.adagnet.net ittrn-cmsub01
10.254.56.12	#This file was generated by the /etc/hosts cluster manager. #It is automatically updated as nodes are added, changed, removed from the cluster. 127.0.0.1 localhost ::1 localhost 10.254.56.11 CMPUB01.adagnet.net CMPUB01 10.254.56.12 ittrn-cmsub01.adagnet.net ittrn-cmsub01

Unified CM Rhosts

Checks the contents of the rhosts file on each installed server and returns a summary checking to see if they are equivalent.

🚫 The rhosts file on 10.254.56.12 does not match the publisher.

⊟*View Details*

Server ▲▼	rhosts File ▲▼
10.254.56.11	localhost ittrn-cmsub01.adagnet.net ittrn-cmpub01.adagnet.net
10.254.56.12	localhost CMPUB01.adagnet.net ittrn-cmsub01.adagnet.net

Unified CM Sqlhosts

Checks the contents of the sqlhosts file on each installed server and returns a summary checking to see if they are equivalent.

🚫 The sqlhosts file on 10.254.56.12 does not match the publisher.
