Resetting the Controller to Default Settings

You can return the controller to its original configuration by resetting the controller to factory-default settings. This section contains the following subsections:

Resetting the Controller to Default Settings (GUI)

- **Step 1** Start your Internet browser.
- **Step 2** Enter the controller IP address in the browser address line and press **Enter**. An Enter Network Password dialog box appears.
- **Step 3** Enter your username in the User Name text box. The default username is *admin*.
- **Step 4** Enter the wireless device password in the Password text box and press **Enter**. The default password is *admin*.
- **Step 5** Choose Commands > Reset to Factory Default.
- Step 6 Click Reset.
- **Step 7** When prompted, confirm the reset.
- **Step 8** Reboot the controller without saving the configuration.
- **Step 9** Use the configuration wizard to enter configuration settings.

Resetting the Controller to Default Settings (CLI)

Step 1 Enter the **reset system** command. At the prompt that asks whether you need to save changes to the configuration, enter **N**. The unit reboots.

Step 2 When you are prompted for a username, enter the **recover-config** command to restore the factory-default configuration. The controller reboots and displays this message:

Welcome to the Cisco WLAN Solution Wizard Configuration Tool

Step 3 Use the configuration wizard to enter configuration settings.
