

Welcome to the team

Use Webex Meetings for a warm welcome

Webex Meetings helps countless employees get started in new roles at thousands of companies around the world. Managers and HR professionals are welcoming new recruits in a way that makes them feel connected and engaged as part of their new team.

Make those first few days inspiring by using Webex Meetings throughout the onboarding process. Use rich screen sharing experiences to take them through applications and systems for booking PTO, applying for identity badges, getting the right equipment, training and signing up for employee benefits.

Your new employees can now join any team from wherever they are, with high definition video for those moments that matter in the first days, weeks and months in a new role.

“ Organizations with an engaging onboarding program retain more than 9 out of 10 of their first-year employees ”

The Society for Human Resources Management and TalentWise

Simple scheduling for new hire groups

Create Webex Meetings for the latest round of new hires in seconds from your calendar. They'll receive simple join instructions and can engage with each other immediately – without the travel. When one new hire asks a question, they'll all get your answer in crystal clear audio and HD video.

Keep everyone on the same page

There's no need to email files in advance of onboarding meetings. Just share content and teach onboarding processes by sharing your screen in real time to keep everyone on the same page.

Put a name to a face

Make sure you set the expectation that we all turn our cameras on for work meetings. Show new hires the best practices and give them confidence to use video every day. As the host, you can use grid view to see how everyone reacts and is using video. Meanwhile, Webex Meetings will allow you to pin your video feed to keep new hires focused on you, as others ask questions.
