

It's virtually done

Conversations matter

You support your team through the highs and lows, creating a supportive culture for them to be successful together.

When they're spread across different cities and countries, it's impossible to get enough in-person face time with everyone to cultivate a strong team culture.

Webex Meetings lets you have the same conversations you have in the office, from fun water cooler moments to progress reviews.

Teams are about so much more than what happens at work. With Webex Meetings you have all the tools you need for those moments that matter, from virtual birthday celebrations to baby showers.

Create thriving
virtual teams with
Webex Meetings.

The power of HD video

The amount of communication that's nonverbal can range between 60% and 90% daily.* Webex Meetings provides high-definition video so everyone can make their presence felt.

Tip: Ask your team to switch on video to build great relationships, just as they would in person. See all your team at once by choosing grid view as your layout of choice.

Collaborate like a dream

You work together to get amazing work accomplished. You all communicate differently through different formats, applications, and file types.

Webex Meetings lets you share all file types - data, pictures, spreadsheets, videos, and more.

Schedule full-featured meetings for your team to share their work. You can schedule a Webex Meeting within your calendar by adding @Webex as the location for your meeting. Everyone can join from any device with one button.
