

A virtual briefing room for your team

Need to make a plan with your team, or get organized for a situation?

Use our new Webex Boards to bring everyone together. The Webex Board is a video-enabled, digital whiteboard that allows you to take a screen shot of any map or image and annotate together, save for later, and ensure no idea is ever missed. People can be a part of your session from anywhere by joining over video and annotating from their device too.

Join a meeting with one button

If you book the room, the board will know about your meeting, press the big green button to join. Folks who join will have one green button on their devices too.

Create an infinite whiteboard

Start a whiteboard to visualize the situation and organize the plan of action. Everyone can write and add to the whiteboard, it will save to Webex Teams for further reference.

Share materials

Anyone can show documents, photos and maps wirelessly using Webex Teams from any device.
