Refresh Resource list via REST API? Jun 14, 2018 7:24 AM

Hi everyone,

I'm developing a script for new user creation and I've hit a snag; after I create the Phone, modify the RMCM application user and modify the User account with the IPCC extension in Call Manager, I need to add the User to different Teams in UCCX, however UCCX doesn't know about the new user yet.

Is there a way to invoke a refresh on UCCX so it picks up the new user?

Thanks!

Re: Refresh Resource list via REST API? Jun 21, 2018 5:26 PM

I found the answer. Do a GET request to: <https://<UCCX-IP/FQDN>/uccx-webservices/getAllAgents>

Got the solution from here:

[Force sync between UCCX AND CUCM?](#)
