How do I upload files via uccxapi??? Jul 28, 2015 10:31 AM

I'm getting slightly frustrated with this specific part of the uccxapi, first and foremost because it's not documented at all, and it's especially frustrating when the rest of the api works great and is sorta well documented.

<http://uccx-server/adminapi/prompt/uploadFile>

This is basically the documentation you get from the development guide for a 10.6 uccx

It does not explain how to construct the http package i'm guessing that i have to attach the wav file somehow, but the order of it is not explained

Further i'm guessing that i probably have to add the temporary folder to the end of the url

<http://uccx-server/adminapi/prompt/uploadFile/templib/>

but the rest of these upload commands are "magic" or at least unexplained.

So if there is an attached xml part needed what is it?

If i have to attach the wav file via multipart/form-data as stated in the document what key names do i use etc.

Does any have a working example of a post http package of any document/script/prompt that they are willing to share? or a working example in php java c# any type of coding language where they actually upload a file.

Hi Christian,

I saw the api guide and as you have mentioned, the guide does not have any example about how to construct the HTTP request to upload the prompt. I have raised a defect (CSCuv91206) to get the required information.

I'll will reply to this post once i get the required information.

Regards,

Amar

How do I upload files via uccxapi???

Hi Christian ,

I tried to upload prompt from api .

I am using POSTMAN in chrome

Refer the attachment.

Regards,

Sameer

So that was first step to upload.

Here is the second step to copy prompt to the required location.

How do I upload files via uccxapi???

Normal Basic Auth Digest Auth OAuth 1.0 No environment

https://[redacted]/adminapi/prompt/ POST URL params Headers (1)

URL Parameter Key Value

Content-Type application/xml Manage presets

Header Value

form-data x-www-form-urlencoded raw Text

```
1 <?xml version="1.0" encoding="UTF-8"?>
2 <Files xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
3 xsi:noNamespaceSchemaLocation="../adminapi/src/main/resources/xsd/Files.xsd">
4 <Prompt>
5 <File>
6 <path>/en_US/</path>
7 <FileName>NKN.wav</FileName>
8 </File>
9 </Prompt>
10 </Files>
```

in response to [Amar Kumar](#)

Hi Amar

Did you ever get a response of this topic?

Br,

Morten Skovborg
