**Link UCCX resource - resource group with REST API** Jun 9, 2015 1:21 AM

Hi,

An UCCX resource can specify its resource group. But the GET request on the resource doesn't return the resource group... So what is the request to get the resource group of an UCCX resource? And what is the request for modifying the resource group of a resource?

The version of UCCX is 10.6.1.10000-39

Thanks,

Fabien

Hi Fabien,

If the resource is not part of any resource group, the resource group tag will not be seen as part of the GET Response for the resource. Once you assign, you will be able to find it in the GET Response.

The GET response for a resource who is already part of a resource group is as shown below

1. `<?xml version="1.0" encoding="UTF-8"?>`
2. `<resource>`
3. `<self>http://10.78.93.232/adminapi/resource/agent8001</self>`
4. `<userID>agent8001</userID>`
5. `<firstName>`
6. `</firstName>`
7. `<lastName>agent8001</lastName>`
8. `<extension>8001</extension>`
9. `<alias>`
10. `</alias>`
11. `<resourceGroup name="RG">`
12. `<refURL>http://10.78.93.232/adminapi/resourceGroup/2</refURL>`
13. `</resourceGroup>`
14. `<skillMap/>`

Link UCCX resource - resource group...

```
15.<autoAvailable>true</autoAvailable>
16.<type>1</type>
17.<team name="Default">
18. <refURL>http://10.78.93.232/adminapi/team/1</refURL>
19.</team>
20.<primarySupervisorOf/>
21.<secondarySupervisorOf/>
22.</resource>
```

You can use the same in the request for modifying the resource group of a resource.

Thanks

Vijay

Hi Vijay,

Thank you for the answer. It's OK.

Thanks,

Fabien
