Is there an API for Workforce Management? Jan 8, 2016 7:19 AM

Hi

As a .NET developer I've been tasked with looking at any available API which may allow us to write data to Workforce Management, I've had a look through the available ones on DevNet but can't see anything promising.

Can anyone confirm (or otherwise) if such an API exists?

regards

At this time, this ability is not available.
