

Never Lose an Idea

1

The Journey Started

Founded by Masoud and Vahid to develop an online tutoring platform in 2014

Discovered very quickly PTS was digitising handwriting into the application.

JIBB

3

Birth of 'JIBB'

Pivoted business to focus on JIBB AI SaaS solution in 2017

2

'Inkerz' - Digital Pen

Initial solution developed was physical "digital pen" with any paper. Logistics, Support and Cost were a massive barrier to success.

4

Jim Marggraf

Founder of Livescribe, invested in JIBB and joined the board as an advisor in 2019

CISCO

5

Cisco Interested

Early traction with Cisco as a partner in Education space stalled by Covid in 2019

6

Renewed Engagement

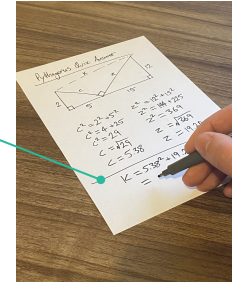

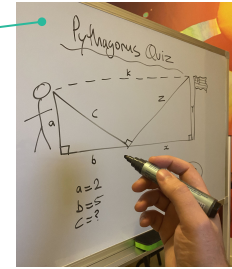

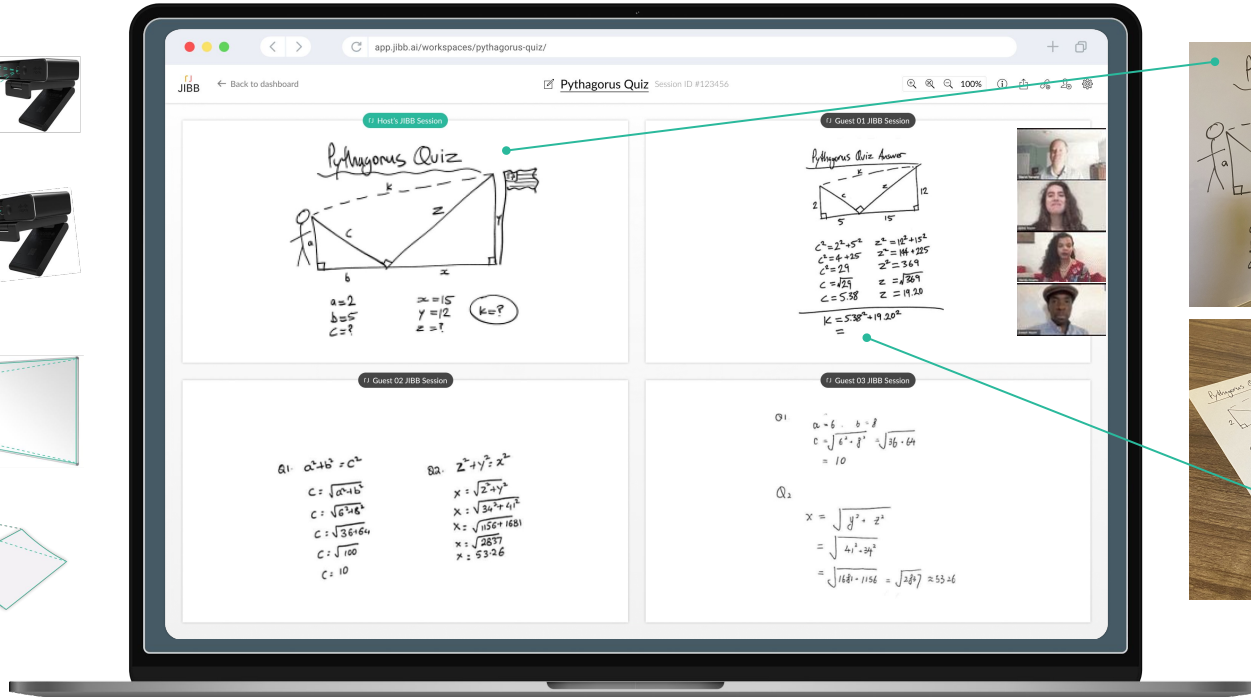

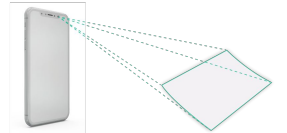

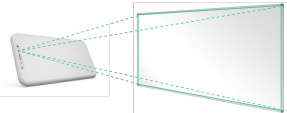

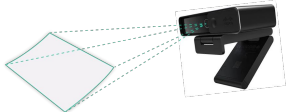

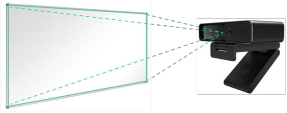

4 months ago Cisco initiated their interest and engagement with JIBB resulting in:

- Bot in Webex Messages
- Embedded App
- SIP Endpoints solution
- ACE engagement
- Ambassadors
- Harvard University
- Presenting at Webex One

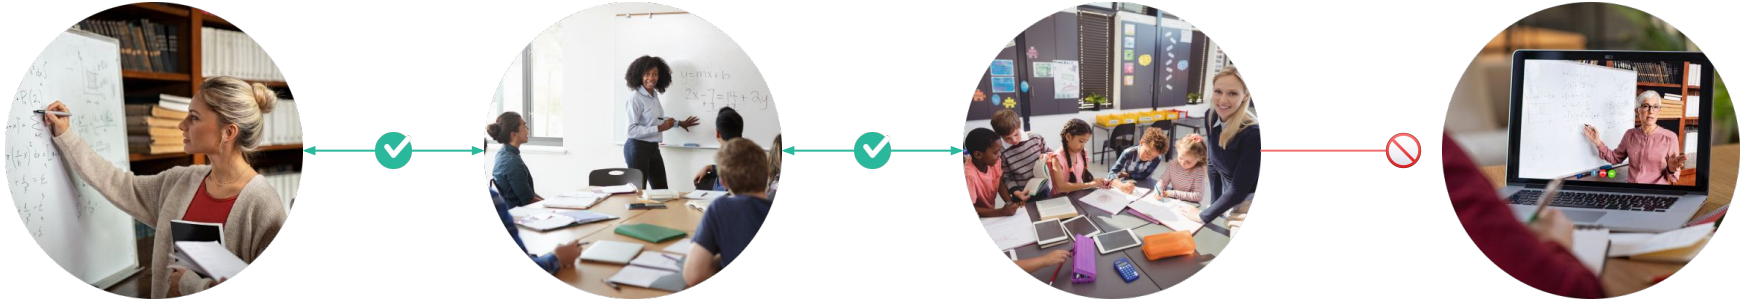

What is JIBB?

JIBB's **patented web based** solution intelligently **captures** your **writing** surface (Whiteboard /Paper) through your **webcam**, **smartphone camera**, **camera in meeting rooms** and digitizes your sketching in **real-time** for you and your team

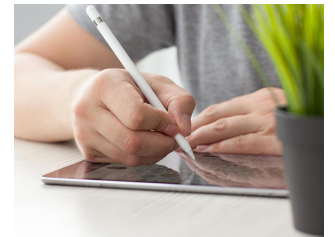

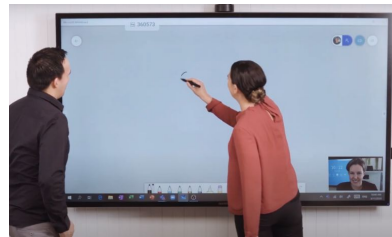

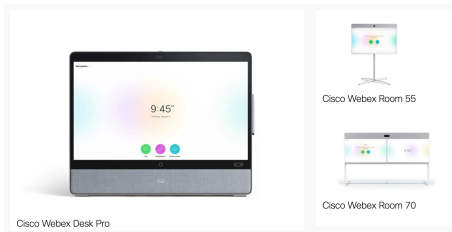

Problem to Solve

Effective teaching in classrooms relies on access to **whiteboards** or **collaborative writing surfaces** to **convey meaningful information and ideas**, however that **valuable form of student engagement** hasn't been properly addressed for online learning.

Less than 5% of classrooms are equipped with **digital whiteboards**. This **lack of accessibility and affordability** for this kind of **hardware based technology** adds even more challenges to making the **online learning experience** as engaging as it should be.

Use Cases in Education

Lectures

Tutoring

Exams

Group thinking

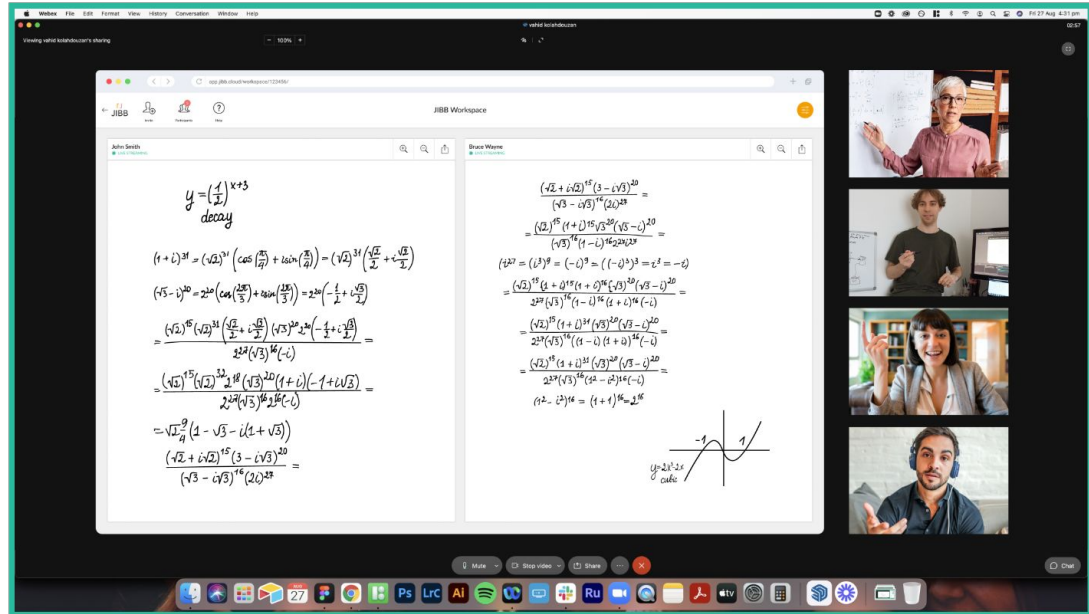

Brainstorming

Quizzes

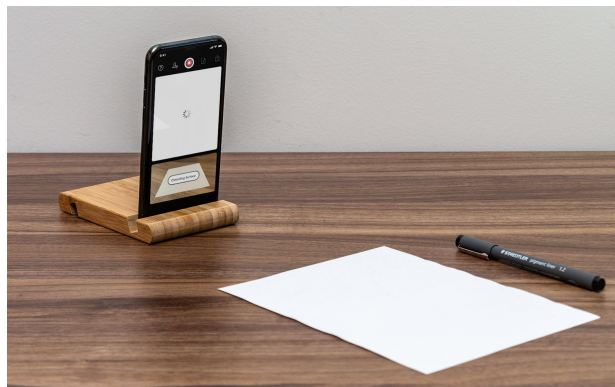

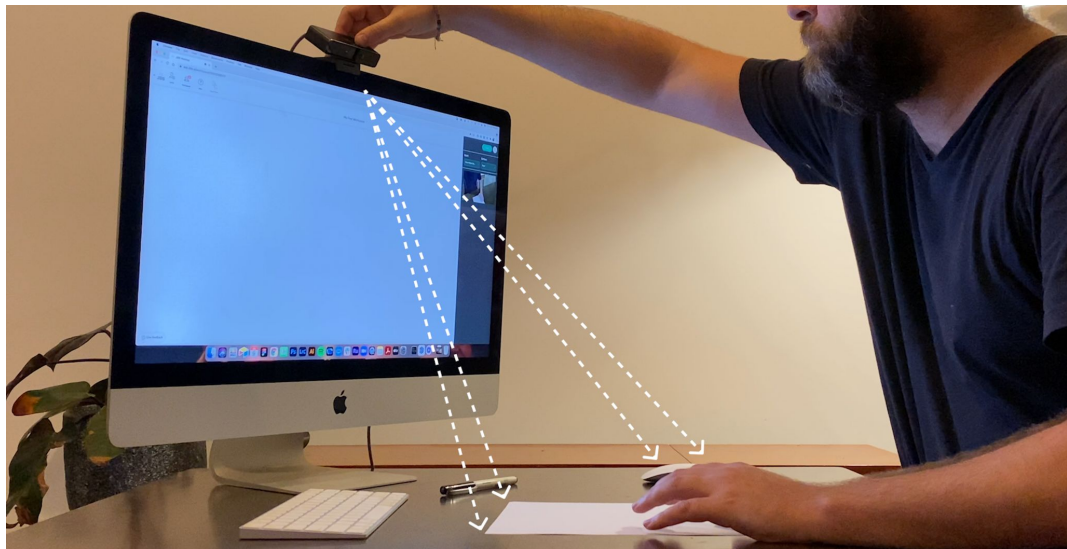

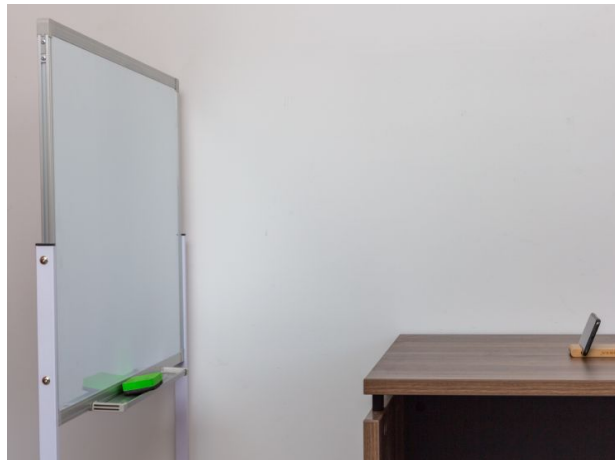

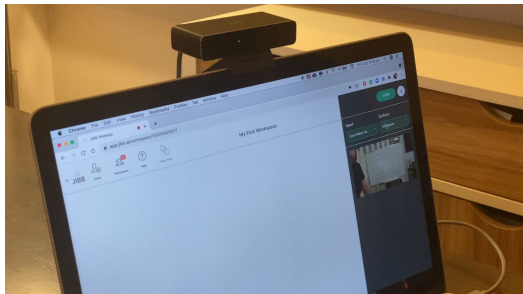

Turn This

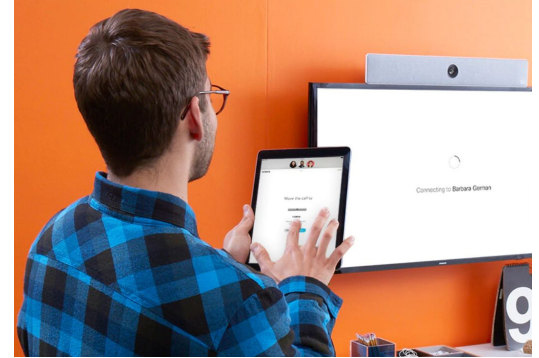

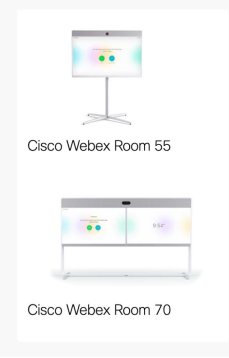

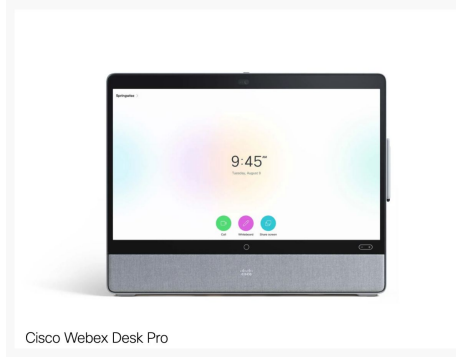

Into THIS using JIBB with any camera

Just aim, write & share

JIBB Works with Room Devices

THANK YOU

Never Lose an Idea
