

Guidelines on using the Cisco Modeling Labs group on the Cisco Support Community

POSTING GUIDELINES QUICK REFERENCE

We encourage your participation in a way that serves to support our entire community. Please do visit this Site often and familiarize yourself with these Posting Guidelines which may be updated from time to time. Violation of these guidelines may result in a request/warning to edit your post and may, in addition, call for a temporary or permanent ban from the Cisco Modeling Labs group.

Remember that continuous use of the Site and/or Services implies your deemed acceptance to the terms of the Acceptable Use Agreement you were presented with when you joined the community. If you do not agree to any of the terms and conditions of the Acceptable Use Agreement, please discontinue your use of this group and its materials immediately. The guidelines below set the minimum standard for User's behavior on the Cisco Modeling Labs group.

Guidelines

Behave Professionally

- This group on the Cisco Support Community is a professional community. We ask that users be respectful of others in the tone of your posts. Be professional and civil.
- Users may not engage in disruptive conduct, post personal attacks or use profanities, negative racial or ethnic slurs or hostile language or tone in their posts or comments. Cisco does not tolerate harassment or denigration based on age, gender, race, religion, national origin, sexual orientation or disability
- Users may not post any materials / videos that contain nudity, indecent, profane, obscene, pornographic, abusive, threatening, misleading, derogatory, illegal or defamatory, inflammatory content or any material that interferes with the ability of others to enjoy or utilize the Site.

No posting or requesting of specific certification exam question details, answers, or scenarios

- Please assist us in ensuring the highest integrity, security, and value of Cisco Certifications. Users may ask questions about preferred study materials or approaches or inquire about general networking situations or equipment.
- **Do not post or request specific exam details, including exact questions, answers, the worksheets used, computations used, drawings, or diagrams from an exam.**
- Users may post information on networking challenges they've encountered and how they solved them, as long as scenarios are not related to material from a Cisco Certification Exam.

Cisco Enforcement

Posts that violate this guideline will be removed. User may receive a warning and /or a temporary or permanent ban from the Cisco Support Community.

- For more details on appropriate conduct of Cisco Certification candidates before, during and after a Certification Exam, see **Candidate Rights and Responsibilities located at** https://www.cisco.com/web/learning/downloads/Candidate_rights_responsibility.pdf

Do not Repost Material that is the Property of Others Without Consent

- Obtain written permission to post material that is not your own and always cite the reference from where the material was taken along with permission details. Say for example, "By <author> or From <website URL or book>. Cited with permission).
- Posting any content--whether text, diagrams, images or video--that is not your own intellectual property is a copyright violation.

If requested by a Cisco representative or authorized third parties acting on behalf of Cisco, you must provide a copy of the written permission to post the intellectual property of the third party that is referenced. Failure to provide the written permission may result in the removal of your post from the site. User may also face a temporary or permanent ban from the Site.

Do not advertise products or services in this group

- Users may post content that contributes to the knowledge of the community, making reference to their learning experiences and resources.
- Refrain from advertising a business, product, or service from which you stand to realize a personal and / or commercial gain.
- Use of this site is intended for individuals, not business entities.

Post may be edited or removed and the User may be issued a warning. Subsequent violations may result in a temporary ban from posting on the in this group.

How to Identify Yourself on the Cisco Support Community

- Do not post personal information including home address, email address, phone number, or any other personal information that you do not wish to be made public.
- Information you provide for registration--your full name and email address--are automatically suppressed. This information will display if you use person information as your Username or Display Name or post it in the field "What do you want others to know about you?" in your Profile. * Cisco specifically disclaims any responsibility or liability with regard to such postings and any actions that result.

You post personal contact information at your own risk. Any such post is visible to the entire community and can be used by others. Posts may be edited or removed if they contain inappropriate personal information; however Cisco does not guarantee that personal information *will* be removed by us for you. Cisco specifically disclaims any responsibility or liability with regard to such postings and any actions that result.
