Introduction

This document provides information about Hot Fix #3 for Tidal Enterprise Orchestrator (TEO) version 2.2.

Prerequisites

Components Used

The information in this document is based on Tidal Enterprise Orchestrator version 2.2.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Hot Fix #3

Problem

TEO Servers, specifically those without connection to the Internet, might see long wait times when XSL Transformation activities are performed.

Solution

Install Hot Fix #3 for TEO 2.2. The hotfix can be found at Cisco Tidal Enterprise Orchestrator Base Product Download Software or by contacting Cisco Support.

Further Information

If you do not use XSL Transformations, then this is not a required hotfix. However, it is recommended. Cisco Support can be contacted through standard means.
