Related Information

Introduction

This article details hotfix #10 for Tidal Enterprise Orchestrator version 2.1.2.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on the Tidal Enterprise Orchestrator Version 2.1.2.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

Refer to Cisco Technical Tips Conventions for more information on document conventions.

Issue

When publishing tasks of non-persistent processes the SNMP, publication fails.

TEO 2.1.2 HotFix 10

HotFix 10 fixes the issue and allows publishing of the SNMP traps. Any release after Tidal Enterprise Orchestrator Version 2.1.2 includes this hotfix and therefore is not required to be patched. Open a case and contact support to get access to this and any other Tidal Enterprise Orchestrator HotFix.
