Cisco Community Live event

How to optimize your Cisco Security investments with Threat Response

February 18th, 2020

with Ben Greenbaum

Register Now: http://bit.ly/cl-T-Response-feb2020

Agenda

- **Using a Multi-Argument Query with the Bulk Edit feature**
  - Update a set of lines to use a new Voicemail Profile
- **Using a Custom File (replaces query) with the Bulk Edit feature**
  - Use Generate Phone Reports to generate data
  - Update the Extension Mobility Checkbox on a set of phones
- **Using a Custom File Format to Update Phones, Lines or Users**
  - Home Cluster Checkbox – Verify and Standardize
  - Deploy a set of Speed Dials/Abbreviated Dials to phones (with or without a KEM)

Agenda

- SOC challenges
- The Solution
- What's new
- Demo
- Resources to get started

Security Operations challenges

SOCs are understaffed

Overwhelmed with alerts from disparate security products

Unable to keep pace with current threats

65% of organizations report a shortage of cybersecurity staff, **1.3 million** positions unfulfilled*

4

Security must work together

But too often it doesn't...

Security Operations

Technologies and Intelligence

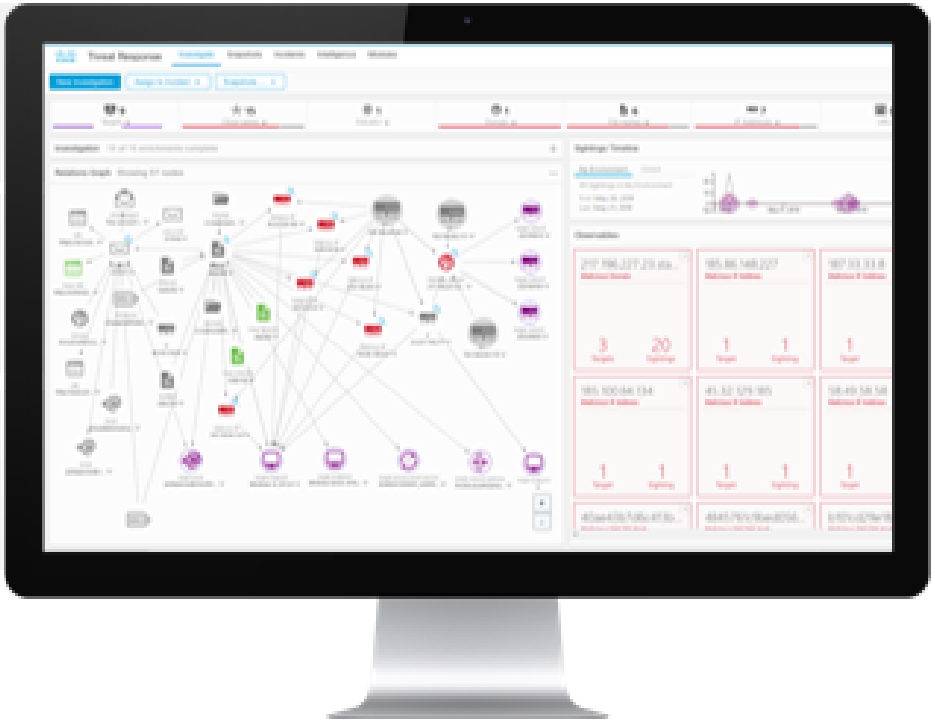
Cisco Threat Response

The unifying force powering Cisco's integrated security architecture

Simple
Detect, investigate, and remediate across multiple integrated security technologies

Fast
Reduce time spent on security operations functions up to 85%*

Effective
Aggregate threat intelligence into immediate action



...and it's FREE with existing Cisco Security licenses

*based on internal simulations

6

How Threat Response works

Intelligence, context, and response

Are these observables suspicious or malicious?

Observables:

- File hash
- IP address
- Domain
- URL
- Email addresses
- Etc.

Have we seen these observables? Where?

Which endpoints connected to the domain/URL?

What can I do about it right now?

Threat Response integrates across Cisco's security portfolio

Included FREE with the following licenses

...and more integrations to come!
