

# Webex Meetings. What's in it for us?

Simple modern video meetings for our workforce.

## Making work as easy as play

Connecting our top talent to work together across time and space is an ever growing challenge we all face. Cisco Collaboration has made it possible for geographically dispersed teams to work together at any time, in any place and on any device. That's powerful. It enables our employees to create value by any means necessary and we're no longer constrained by where the best talent is based.

Our investment in Webex Meetings is motivated by the need to improve the way we work, resulting in a wide range of benefits to our business.

From faster decision making, time to market, fewer absences, and reducing travel - we have the opportunity to give our employees the collaboration tools they deserve and need to run our business. We can even save money by reducing office space as people can work from anywhere. The HD video experience creates a more engaged workforce, regardless of location.

## About Webex Meetings

Webex Meetings is the most widely adopted and trusted meetings service on the market. It provides simple, modern video meetings with the easiest schedule and join experience.

People can join from any device including browser, mobile, desktop, phone and video systems. Webex Meetings is globally available, secure and made to maximize bandwidth, to reduce delays so that everyone has an amazing experience no matter where they are.
